The screenshot shows the Azure DevOps interface for the 'Econnectee frontend' project. The 'Backlog' tab is selected. The backlog is organized into two main sections: one for tasks related to 'Employee task evaluation' and another for general development tasks like 'Create Face detection / authorization : EMP'. Each task is listed with its title, ID, state (e.g., Committed, Done), assigned to (e.g., IT19132310, IT19139036), and remaining work. The interface includes a sidebar with navigation links like Overview, Boards, Backlogs, Sprints, Queries, Delivery Plans, Repos, Pipelines, Test Plans, and Artifacts. The top right shows a sprint view for 'Sprint 2' from September 1 to September 30.

Order	Title	State	Assigned To	Rema...
1	Wait is used for a non promise statement	Committed	IT19139036

2. Sprints

Econnectee frontend Team Backlog			
Sprint 1	Current	8/1/2021 - 9/30/2021	44 working days
Planned Effort: -			
 36  2			
Sprint 2		9/1/2021 - 9/30/2021	22 working days
Planned Effort: -			
 20			

3. Backlog items related to sprint 2

The screenshot shows the 'Backlog' view for the 'Econnectee backend' team. The backlog items are listed in a table with columns: Order, Work Item Type, Title, State, Effort, Value Area, Iteration Path, and Tags. There are 8 items in the backlog:

Order	Work Item Type	Title	State	Effort	Value Area	Iteration Path	Tags
1	Product Backl...	Project manager model	Approved		Business	Econnectee backend\Sprint 1	
2	Product Backl...	Password Controller	Approved		Business	Econnectee backend\Sprint 1	
3	Product Backl...	Attendance route	New		Business	Econnectee backend\Sprint 1	
4	Product Backl...	Sprint controller	New		Business	Econnectee backend\Sprint 1	
5	Product Backl...	Project manager controller	New		Business	Econnectee backend\Sprint 1	
6	Product Backl...	Project manager route	New		Business	Econnectee backend\Sprint 1	
7	Product Backl...	Password model	New		Business	Econnectee backend\Sprint 1	
8	Product Backl...	Password route	New		Business	Econnectee backend\Sprint 1	

4. Boards

The screenshot shows the 'Board' view for the 'Econnectee backend' team. The board has four columns: New, Approved, Committed, and Done. Each column contains a list of work items:

- New:** Contains a button to 'New item'.
- Approved:** Contains two items:
 - #110 Project manager model (State: Approved)
 - #123 Password Controller (State: Approved)
- Committed:** Contains three items:
 - #102 Attendance route (State: Committed)
 - #109 Project manager controller (State: Committed)
 - #111 Project manager route (State: Committed)
- Done:** Contains five items:
 - #125 Password route (State: Done)
 - #124 Password model (State: Done)
 - #111 Project manager route (State: Done)
 - #106 Sprint controller (State: Done)

1. Repository view

The screenshot shows the GitHub profile page for Senura Vihan Jayadeva. At the top, there's a search bar and navigation links for Pull requests, Issues, Marketplace, and Explore. Below the header, there's a large circular profile picture of a man in a suit. The profile section includes the name "Senura Vihan Jayadeva" and the handle "senuravihanjayadeva". A "Unfollow" button is present. A bio states: "I am interested in web development, Machine Learning, IoT, AI, and I am seeking exciting opportunities related to the same." Below the bio, it says "At 39 followers · 13 following · ⭐ 3". There are links to the user's website (<https://senuravihanjayadeva.web.app>) and Twitter (@Senurajayadeva).
The main content area features two pinned repositories: "EconnecteeFrontend" (Public, JavaScript) and "CandyPanda-LS/Econnectee-Backend" (Public, JavaScript). It also displays a heatmap showing contributions per day of the week (Mon, Tue, Wed, Thu, Fri, Sat, Sun) across the last year. A summary indicates "1,207 contributions in the last year". Below the heatmap, a "Contribution activity" section shows a timeline from October 2021 to 2019, highlighting commits made in various repositories like "SE3070/implementation-walkthrough-2021s2_req_we_13" and "Y3S2-Assignment-Group/CSSE-Backend".

Hello Github! I'm Lasal Hettiarachchi. A passionate software developer from Sri Lanka. My goal is to make the world a better place using technology. Some technologies I like to work with include React JS , Node JS , Java (springboot) , NoSQL databases. I believe that as a community we can achieve more, hence I'm currently planning on engaging in open source contributions

- proficient frameworks : MERN stack, Springboot , SQL , NoSQL , C, Arduino
- Currently learning : Python , Octave (Scientific programming) , Android

Contact me on my social media handles.

7. Code Frequency

8. Pulse

The screenshot shows the GitHub Pulse interface for the repository `senuravithanjayadeva / EconnecteeFrontend`. The main dashboard displays an overview of activity from September 2, 2021, to September 9, 2021. Key metrics shown include 41 Active Pull Requests, 0 Active Issues, 34 Merged Pull Requests, 1 Open Pull Requests, 0 Closed Issues, and 0 New Issues. A bar chart visualizes commit counts across various authors. Below the main summary, a section titled "sprint reducer" shows 44 merged pull requests from 2 days ago, and a "sprint backlog" section shows 40 merged pull requests from 2 days ago.

The screenshot shows the GitHub Pulse interface for the repository `CandyPanda-LS / Econnectee-Backend`. The main dashboard displays an overview of activity from September 2, 2021, to September 9, 2021. Key metrics shown include 10 Active Pull Requests, 0 Active Issues, 5 Merged Pull Requests, 0 Open Pull Requests, 0 Closed Issues, and 0 New Issues. A bar chart visualizes commit counts across various authors. Below the main summary, a section titled "sprint backlog" shows 40 merged pull requests from 2 days ago.

# Project Description
Econnectee is the all in one stop for an employee/ project management system . The project focuses on the main aspects of employee management such as employee attendance marking through an azure cognitive service face API and project management aspects such as project creation , sprint creation , manager allocation , Sprint , Task management.

# Technologies

- Frontend : React
- Backend : Node JS
- Database Solution : Mongo DB
- State management library : Redux
- User Authentication : JWT

# How to get started with the app

## Prerequisites
1. Node JS version 10 or later installed
2. npm package manager
3. Set up the environmental variables for the package manager

## Getting started

### Prerequisites

- Node JS environment installed
- Node package manager installed
- JavaScript supported Browser

### Procedure of setting up the project

- Move into your projects directory: cd ~/YOUR_PROJECTS_DIRECTORY
- Clone this repository: git clone
- Move into the project directory: cd YOUR_PROJECT_NAME
- Install the dependencies: npm install
- Start the project: npm start
- Deployed backend is connected to the frontend project. If you want to setup the backend locally please change it in the .env file in src/api
- Deployed Frontend = https://econnectee.web.app/

SonarQube

1. Overview status of analyzed projects

The screenshot shows the SonarQube interface for a single project named "Econnectee_frontend". The project has passed its quality gate. Key metrics displayed include:

- Bugs: 0 (A)
- Vulnerabilities: 0 (A)
- Hotspots Reviewed: 0.0% (E)
- Code Smells: 132 (A)
- Coverage: 0.0%
- Duplications: 29.1%
- Lines: 9.9k (S) JavaScript...

The interface includes filters for Quality Gate (Passed, Failed), Reliability (A-E), Security (A-E), and Security Review (≥ 80%). A search bar and a "Create Project" button are also visible.

The screenshot shows the SonarQube interface for two projects: "Econnectee_backend" and "Econnectee_frontend". Both projects have passed their quality gates. Key metrics for "Econnectee_backend" are:

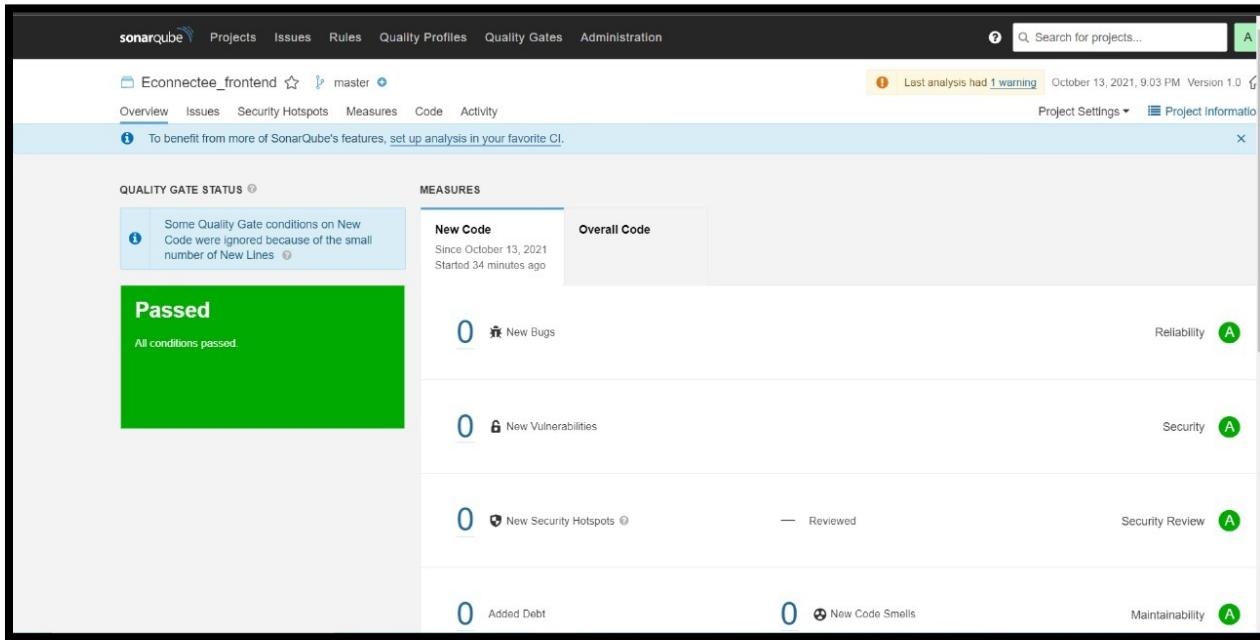

- Bugs: 0 (A)
- Vulnerabilities: 0 (A)
- Hotspots Reviewed: 0.0% (E)
- Code Smells: 25 (A)
- Coverage: 0.0%
- Duplications: 17.1%
- Lines: 1.7k (S) JavaScript

Key metrics for "Econnectee_frontend" are:

- Bugs: 0 (A)
- Vulnerabilities: 0 (A)
- Hotspots Reviewed: 0.0% (E)
- Code Smells: 132 (A)
- Coverage: 0.0%
- Duplications: 29.1%
- Lines: 9.9k (S) JavaScript...

The interface includes filters for Quality Gate (Passed, Failed), Reliability (A-E), Security (A-E), and Security Review (≥ 80%, 70%-80%, 50%-70%). A search bar and a "Create Project" button are also visible. A note at the bottom states: "Embedded database should be used for evaluation purposes only. The embedded database will not scale, it will not support upgrading to newer versions of SonarQube, and there is no support for migrating your data out of it into a different database engine."

2. Project overview

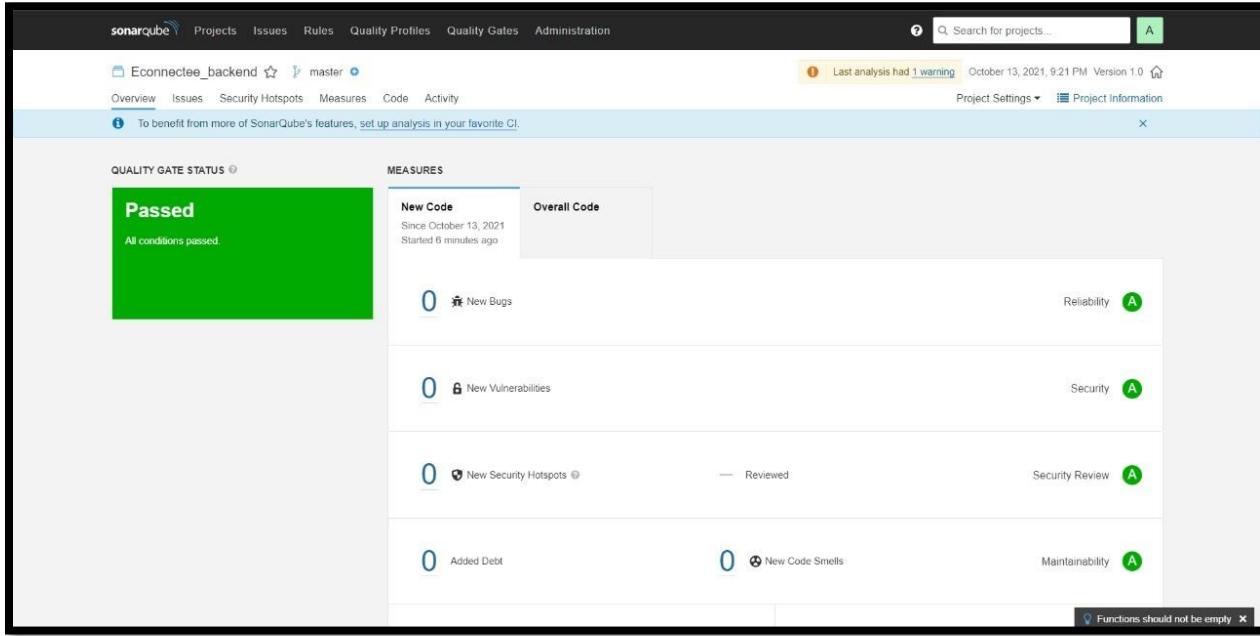

SonarQube Project Overview for Connectee_frontend (master)

Project Status: Passed (All conditions passed)

MEASURES

Measure	Value	Status
New Code	0 New Bugs	Reliability A
Overall Code	0 New Vulnerabilities	Security A
	0 New Security Hotspots	Security Review A
	0 Added Debt	Maintainability A
	0 New Code Smells	

Last analysis had 1 warning | October 13, 2021, 9:03 PM | Version 1.0

SonarQube Project Overview for Connectee_backend (master)

Project Status: Passed (All conditions passed)

MEASURES

Measure	Value	Status
New Code	0 New Bugs	Reliability A
Overall Code	0 New Vulnerabilities	Security A
	0 New Security Hotspots	Security Review A
	0 Added Debt	Maintainability A
	0 New Code Smells	

Last analysis had 1 warning | October 13, 2021, 9:21 PM | Version 1.0

Functions should not be empty

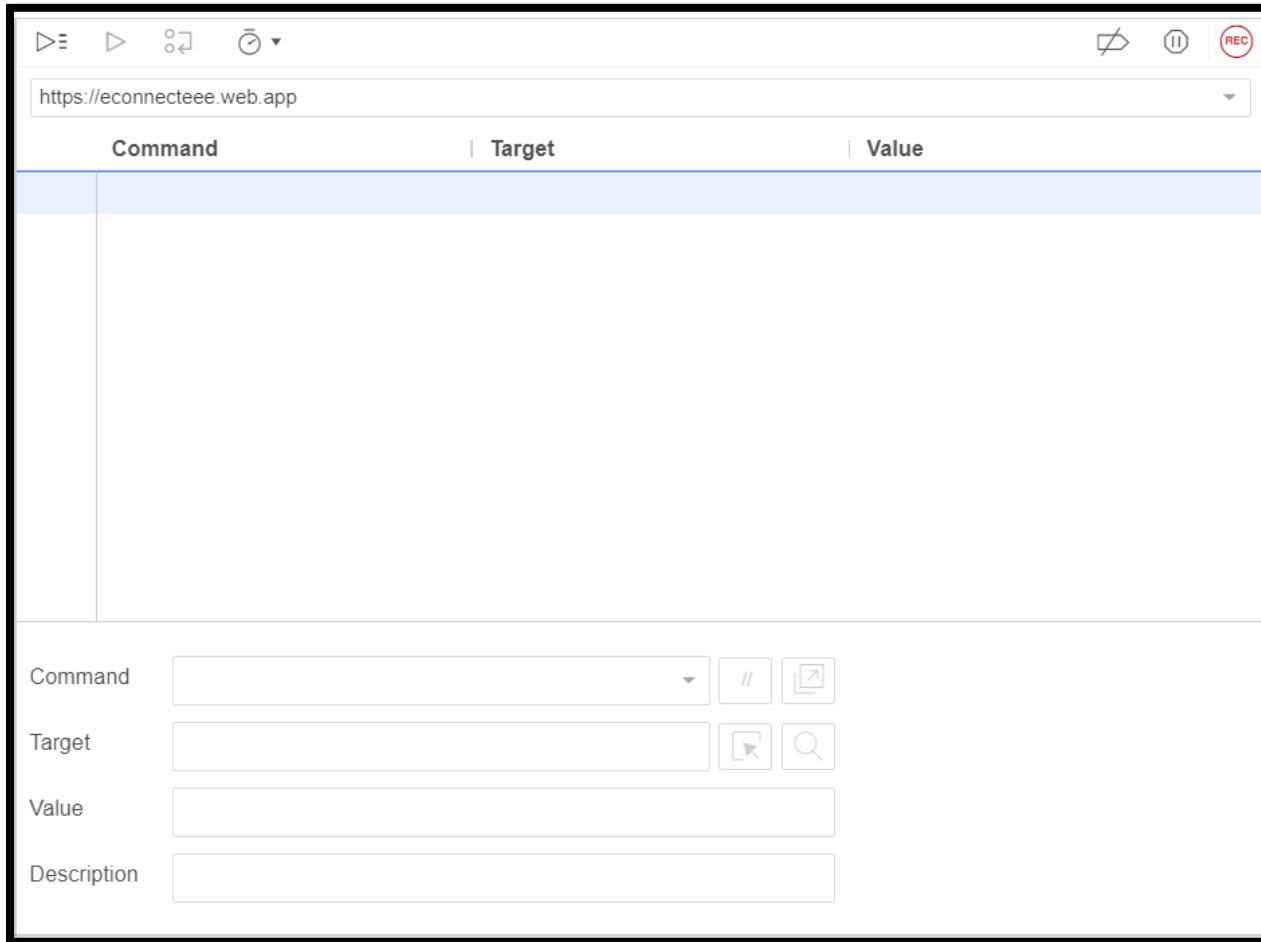

3. Project issues

The screenshot shows the SonarQube Issues page for the 'Econnectee_frontend' project. The top navigation bar includes 'Projects', 'Issues', 'Rules', 'Quality Profiles', 'Quality Gates', and 'Administration'. A search bar at the top right says 'Search for projects...'. Below the navigation, it shows the branch 'master' and the status 'Last analysis had 1 warning' from 'October 13, 2021, 9:03 PM Version 1.0'. On the left, there's a sidebar with 'Filters' for 'Type' (Bug, Vulnerability, Code Smell), 'Severity' (Blocker, Critical, Major, Minor, Info), and various 'Scope' and 'Resolution' filters. The main area displays a list of issues with their file paths and descriptions. One issue is highlighted with a blue border: 'Unexpected empty source' in 'src.../AdminDashboardModules/AdminDashboardCardSection.css'. Other issues listed include 'Remove this useless assignment to variable "index"', and 'Remove this useless assignment to variable "index"'.

The screenshot shows the SonarQube Issues page for the 'Econnectee_backend' project. The layout is identical to the first screenshot, with the same navigation bar, search bar, and analysis details. The sidebar filters are also the same. The main list of issues shows several code smell violations. One specific issue is highlighted: 'config' is already declared in the upper scope' in 'controllers/Employee.controller.js'. Other highlighted issues include 'Add the "let", "const" or "var" keyword to this declaration of "calculateEmpSalary" to make it explicit.', 'Update this function so that its implementation is not identical to the one on line 95.', 'Update this function so that its implementation is not identical to the one on line 95.', 'Remove this commented out code.', and 'projectManager' is already declared in the upper scope'.

'Employee login' completed successfully 23:55:37

The screenshot shows a software interface for creating and executing automation test scripts. At the top, there's a header bar with project name, search bar, and various icons. Below it is a sidebar with a tree view of tests: 'Admin login*', 'Edit profile*', 'Employee login*', 'Profile update*' (highlighted in red), and 'project update*'. The main area contains a table with columns for Command, Target, and Value, listing steps like opening a URL, setting window size, and clicking specific elements. Below the table are input fields for Command, Target, Value, and Description. At the bottom, a log section displays the execution of each step with its status (OK) and timestamp.
